

# Sound

When it comes to the technical quality of a worship session, sound technicians play a key role in ensuring the music sounds excellent in the main hall.

On a Sunday morning, a sound tech or crew has various tasks. They:

- Set up & tear down all the sound equipment and cables.
- Perform microphone and instrument checks to make sure everything is working correctly.
- Troubleshoot and resolve any related problems
- Mix the different vocals and instruments to create a balanced, quality sound
- Record the sermon at the appropriate time
- Play appropriate pre- and post-service music

## Team Requirements

- Be involved on the team at least once per month
- Be willing to commit for six months
- Arrive at 8:45 on a Sunday to set up by 9:30 (set up usually takes around 45 minutes to an hour)
- Participate in our pre-service prayer starting at 10:10 am (if not working with the musicians)

Thanks for your interest in this team!
